Leading the Way with Inclusive Wayfinding

"Alone we can do
so little; together
we can do so much."

– Helen Keller

The Gold Standard for BTS, Wayfinding & Compliance.

Proudly Australian-made and owned, Braille Tactile Signs Aust. stocks the largest range of Australian Standard and Building Code compliant signage, with thousands of signs ready to ship daily. Clients can customise any item in our standard range or have bespoke signage designed and manufactured to exact specifications.

Australia and the world's leading businesses trust Braille Tactile Signs Aust. to deliver accessible solutions that ensure clarity, compliance and ease of navigation. From consulting to custom signage, we take care of it, so you don't have to.

Built to outperform, our signs are durable, compliant, visually refined, and easy to keep clean. Trusted by Engineers, Architects, Consultants, Builders, Government Bodies and Private Organisations alike.

We partner with leading brands across Australia to create inclusive, intuitive and compliant spaces that empower independence.

Our Products & Services

Why Australia's Biggest Brands Choose BTS Aust.

Our Three Unique Technologies

At BTS Aust., we believe that Braille Tactile Signs should be more than just a requirement. They should be functional, long-lasting, adaptable, and suited to the user and environment. That's why we've developed three unique BTS technologies that exceed industry standards and deliver superior durability, high customisation, and outstanding value.

Driven by Impact: Focused on meaningful outcomes, we create signage that delivers real impact for end-users.

Aligned with ISO Standards: Our systems are aligned with ISO values consistent processes, safer outcomes, and better relationships.

Hear from Our Clients

Making accessibility happen over 24,000 stops and counting.

"We've worked with the BTS Aust. team for over a year on a project enabling passengers with vision impairments to access timetable information. Covering around 21,500 bus stops in metropolitan Melbourne and over 2,500 in regional Victoria, it's been one of the largest projects of its kind globally."

Grant Cooper
Project Manager

"BTS Aust. has consistently delivered outstanding service and a quality product that withstands the harsh demands of the public transport environment, while meeting critical deadlines for the Victorian Government. Their clear processes and streamlined procedures have ensured efficiency in both time and cost, allowing us to receive a high-end product at a highly cost-effective price."

Ann Murray
Miepol

Consistent, robust, reliable. BTS Aust. delivers every time.

"Braille Tactile Signs Aust. lead the way in Braille signs. Deakin University have utilised BTS Aust. Products for many years because of their consistency, robustness and longevity.

Working with the BTS Aust. team, I have found them co-operative in providing custom braille signage to suit Deakin's special facilities and room signage standard. Their service to be very professional and meeting tight deadlines. I highly recommend BTS Aust. for all your signage needs."

Muazz Ali
Project Office

One of the most reliable suppliers that I've dealt with.

"I have nothing but praise for BTS Aust. on how they excellently deliver on time, attend to our urgent requirements and make you feel that you are the priority. They are committed to fulfilling your demands and communicate if there is any issue, for which I'm very happy with. They listen and work with you to be able to produce a better signage solution."

Lorena Manuel
Operational Buyer

Would recommend BTS Aust. to anyone who expects the best in service and quality.

"BTS Aust. was engaged by Diadem to manufacture Braille signage for the Royal Children's Hospital, including custom designs and PMS colour combinations. Despite a late schedule change, Claudia and the team delivered on time, to spec, and with outstanding communication. We were all very happy with the project outcome."
